Created database 'restau.db' for connection named default
mkardal@mkardal-Latitude-E6430s: ~/Documents/TP/examTP/restaumange-KardalMohammed$
  
```

- 4) Générer les entités avec la commande : php bin/console make:entity
- 5) Générer les relations entre les entités avec la commande : php bin/console make:entity user
- 6) Fournir valeur par défaut : ajouter constructeur dans les entités Restaurant.php et Review.php
- 7) Créer la migration : php bin/console make:migration AND php bin/console doctrine:migrations:migrate
- 8) Créer le controlleur : php bin/console make:controller UserController
- 9) php bin/console doctrine:migrations:generate AND php bin/console doctrine:migrations:migrate
- 10) Implémenter les routes :
- 11) Afficher les 6 derniers restaurants créés
- 12) Afficher la valeur moyenne de la note d'un restaurant
- 13) Afficher les 3 top meilleurs restaurants
- 14) Lister les restaurants et leurs détails
- 15) Classer les restaurant par vot
